This is only a partial excerpt. The full 22-page WBS file contains a complete cross-functional work breakdown, from business process requirements definition through acceptance testing and deployment and including tasks such as training and documentation. In addition, every task is annotated with notes on the purpose of that task and guidelines for executing it. You can download the complete WBS from http://www.projectconnections.com/knowhow/templates/wbs-it-software-development.html with a ProjectConnections registration.

	Took Name	Drodoossss-	Pasauras Namas	. 10 101	
0	Task Name	Predecessors	Resource Names	18, '01	Dec 2, '01 T F S S M T V
B 😥	Write Requirements Document	51	SME		
9	Support Requirements Documentation	51SS	AT Project Team		
(Verify Requirements Document	59	SME,Other Business Areas,AT Project Team ,Project Business Owner		
1	Write Req'ts for Vendor (Outsourced) Development	60	SME,AT Project Team ,AT Technology Directors		
2	Procurement of h/w, s/w for Development Environment	43	Project Manager,Procurement Lead		
3	Prepare Development Environment	62	AT Project Team		
(4)	Refine Impact Analysis	60	SME,AT Project Team		
5	Refine Risk Analysis	60,61	SME,AT Project Team		
6 (Generate Requirements Traceability Matrix	60,61	SME		
(Sign off on Requirements Document	60	Project Business Owner		
(4)	Refine Project Management Plan	60,61,64,65,66	Project Manager,AT Project Team		
(4)	Conduct Quality Gate Review: Requirements Phase	57,68	PMO ,Project Business Owner,SME,AT Project Team		
(Complete Quality Gate Action Items	69	Project Manager,SME,Project Business Owner,AT Project Team		
6	Design Phase				
0	External Design	60	Software Engineering Team Lead, Software Engineering Team		
	External Design Workshops and Analysis	60,64	Software Engineering Team ,SME		
	Integrate AT Technical Standards	73	System Engineering Team Lead,Project Architect,System Operation Te		
	External Design Development	74	Software Engineering Team		
	Documentation of External Design	75	Software Engineering Team		
	Verification of External Design	76	Software Engineering Team ,AT Project Team ,Project Architect,SME,S		
	External Design Review	77	AT Project Lead,Software Engineering Team Lead,Project Architect,SN		
(S)	Detailed Design		,		
<u>(4)</u>	Detailed Design Workshops	77,60	Software Engineering Team		
	Joint Application Design workshops	77,60	Software Engineering Team ,SME,System Engineering Team System C		
2 (4)	Physical Data Model	77,60	Data Resource Mgmt Team Lead		
3	1	77,60	Software Engineering Team ,Project Architect		
	Storyboard workshops	77,60	Software Engineering Team ,SME		
-		77,60	Software Engineering Team ,SME		
2	Design Prototyping Integrate AT Technical Standards				
δ 🧶		77,60	System Engineering Team Lead Project Alamied		
7	Develop Detailed Design	77,60	Software Engineering Team		
3 6	Documentation of Detailed Design	87	Software Engineering Team		
	Verification of Detailed Design	88	Software Engineering 1 and Lea 1,A Proje Proje Ct,S		
	Define Procurement Requirements	89	Project Manager, Procureinent Lead, Soi, vare Engineering Team Lead, Soi, vare Engineering Team Lead, Soi, vare Engineering Team Constitution		
<u> </u>	Define Facility Readiness Requirements	90	Project Manager, Training - Loot - De Noymen Lead System Operation		
	Test Planning	60	Davidson Tool of House Tool of		
	Test Analysis of Requirements	60	Development Test Lead User Te. Lead Software Engineering Team Le		
	Test Analysis of Design	39	Dove homen' Test Lead User Test Lead, Software Engineering Team Le		
(Analysis of Developer Test needs	93,94	Development Test Lead Software Engineering Team ,System Engineer		
	Analysis of Acceptance Test needs	03 94	User Test Lad, Software Engineering Team		
	Documentation of Development Tes Plans	95	Development Test Lead		
1	Documentation of Acceptance Test Plan	96	User Test Lead		
(Verification of Development Test Plan	97	/ Project Team ,Development Test Lead		
(Verification of Acceptance Test Plan	98	SME,AT Project Team ,Development Test Lead		
1 🧆	Refine Impact Analysis	89,99	SME,Other Business Areas,AT Project Team		
2	Determine Procurement Needs: Technical Solution	39,101	Software Engineering Team Lead,Project Manager,Procurement Lead		
3	Determine Procurement Needs: Development Test	89,99	Development Test Lead		
4	Determine Procurement Needs: User Acceptance Test	89,100	User Test Lead		
5	Refine Project Management Plan	89,101,99	Project Manager,AT Project Team ,Development Test Lead,User Test L		
6	Generate Requirements Traceability Matrix	89,99	Software Engineering Team Lead,AT Project Team , Development Test		
7	Conduct Quality Gate Review: Design Phase	105,115,114,1	PMO ,Project Manager,AT Project Team ,SME,Project Business Owner		
8	Complete Quality Gate Action Items	107	Project Manager,AT Project Team ,SME,Project Business Owner		
19	Development Phase				
0	Development				
	Develop the Executable System components	89	Software Engineering Team		
2	Develop the Physical Database	82	Data Resource Mgmt Team Lead		
3	Unit Test	112	Software Engineering Team		
- Č	Develop Conversion, Implementation, Installation Plan(s)	89,104,102.10	Software Engineering Team ,System Engineering Team,Training - Doct
